## Tech Stack

### Languages

JavaScript  
Python  
HTML  
CSS  
SASS

### Dev Tools

Git/GitHub  
Heroku  
Postman

### Databases

MongoDB  
PostgreSQL

### Libraries & Frameworks

React  
Redux  
Node  
Express

### Visualizations

AdobeXD  
Adobe Illustrator  
Adobe Photoshop

### Testing Suites

Jest  
JUnit  
RTL

## Education

### Alchemy Code Lab

Full stack software development

### Chaffey college

Physics

## Certifications

### JS Data Structures & Algorithms

FreeCodeCamp

### Harvardx CS50

EdX

## PROFILE

Software Engineer dedicated to creating practical, intuitive, and accessible solutions with software. A self-motivated and insatiably curious lifelong learner passionately optimistic about people's ability to solve problems.

## PROJECTS

### DragonStack [GitHub](#)

JavaScript, React, Redux, NodeJS, Express, postgresQL, HTML, CSS

Solo Full stack project created with React/Redux, Express, NodeJS, and postgresQL that allows users to buy, sell, and trade rare dragons using virtual currency. New dragons are born in "generations" with randomly generated attributes to create unique dragons. Users create and sign into their accounts, and can view the dragons of other users in the web app. Utilizes full CRUD operations to create RESTful API, and state management using Redux.

### Movi-Bytes [GitHub](#)

JavaScript, React, NodeJS, Express, postgresQL, HTML, CSS

Full stack web app created in a one-week sprint as part of a team of four. Helps users decide which movies to add to their bucket list by providing movie info and trailers to users using a slick, Netflix-like interface. Users can create an account, add movies to their watch list, upvote and downvote movies, as well as search for specific movies. Upvotes and downvotes are displayed as an aggregate to all users.

### Market Web Scrape [GitHub](#)

JavaScript, React Native, Puppeteer, NodeJS, Express, postgresQL

Full stack IOS application created as part of a team of six. Scrapes data from multiple local market sites, aggregates data and displays it to users given a user search. Primarily responsible for picking up React Native and creating the front end list components and details page. Used Expo and XCode virtual machine to develop a native IOS interface.

## EMPLOYMENT

### Citrus Motors of Ontario

Team Leader/Product Specialist, 2019-2020

Consistently met and exceeded quota by 150 - 200%. Deemed by superiors and fellow teammates as a high-achiever and hard worker. As a team leader, dedicated to principle of leading by example.

### FoodFirst Global Restaurants

Food Server, 2016-2019

Worked effectively as part of a broader team in a fast-paced environment to deliver high-quality service and food to customers. Described by peers as a hard worker that went above and beyond what was asked.
