PROFILE

Software Engineer who loves coding and technology. A self-starter dedicated to creating practical, intuitive, and accessible solutions with software. An insatiably curious lifelong learner who's intensely optimistic about human nature and our ability to solve problems.

PROJECTS

Chordial   *GitHub* || *Website*
React, Redux, CSS, NodeJS, Express, PostgreSQL

- Developed as part of a team of three
- Allows users to create beautiful harmonic sequences from curated collections of musical chords
- Responsible for implementing core data structure, state logic for rendering chords, overall app design and animation, and more

Life Organizer   *GitHub* || Website
React, Redux, CSS, NodeJS, Firebase,

- Developed Individually
- A to-do web app that allows users to create projects and tasks that can be organized via timeframe for completion of the task
- Developed in order to learn Google Firebase as a new technology to utilize in future builds

Amazon Clone   *GitHub* || Website
NextJS, Tailwind, Firebase, Stripe, OAuth 2.0

- Developed Individually
- An Amazon clone where users can sign in via Google, add items to cart, and checkout using Stripe
- Developed in order to learn and utilize new technologies such as Stripe checkout, Tailwind, and OAuth
